

HKBK COLLEGE OF ENGINEERING

Common to all branches (CSE, ISE, ECE, AIML, ME, CV)

2nd IA question bank

Universal human values -BUHK408

Module 4-Harmony in the Nature and Existence

1. What are the fundamental components of ecosystems?

- a) Plants and animals
- b) Air and water
- c) Rocks and minerals
- d) All of the above**

2. Which of the following factors influence climate?

- a) Solar radiation
- b) Atmospheric gases
- c) Ocean currents
- d) All of the above**

3. Which field of study deals with the Earth's solid materials and processes shaping its structure?

- a) Biology
- b) Geology**
- c) Ecology
- d) Anthropology

4. What term refers to the variety of living organisms in a given area?

- a) Ecosystem diversity
- b) Species diversity
- c) Genetic diversity
- d) Biodiversity**

5. Which of the following human activities can disrupt natural systems and alter the interactions between components?

- a) Agriculture
- b) Deforestation
- c) Urbanization
- d) All of the above**

6. Which sustainable practice reduces reliance on fossil fuels and decreases greenhouse gas emissions?

- a) Waste reduction and recycling
- b) Water conservation
- c) Renewable energy**
- d) Green building design

7. Which practice helps minimize waste generation and reduces energy consumption?

- a) Sustainable agriculture

- b) Renewable energy
- c) Energy efficiency**
- d) Conservation and preservation

8. Which sustainable practice helps reduce carbon emissions and promote environmentally friendly transportation?

- a) Renewable energy
- b) Water conservation
- c) Waste reduction and recycling
- d) Sustainable transport**

9. Which sustainable practice helps reduce carbon emissions and promote environmentally friendly transportation?

- a) Renewable energy
- b) Water conservation
- c) Waste reduction and recycling
- d) Sustainable transport**

10. Which type of feedback loop destabilizes a system and leads to exponential growth?

- a) Positive feedback loop**
- b) Negative feedback loop
- c) Collaborative feedback loop
- d) Resilient feedback loop

11. What is the purpose of systems thinking in engineering?

- a) To understand the butterfly effect
- b) To analyze problems and design solutions by considering the relationships between components**
- c) To regulate body temperature through negative feedback loops
- d) To promote collaboration and interdisciplinary work

12. Which example demonstrates a negative feedback loop?

- a) Melting of polar ice caps
- b) Formation of a tornado
- c) Regulation of body temperature**
- d) Collaboration between professionals

13. How does understanding interconnectedness help in designing resilient systems?

- a) By considering the potential impacts of environmental changes**
- b) By engaging with professionals from different fields
- c) By widening and relaxing blood vessels
- d) By amplifying the initial change or deviation from the norm

14. What is self-regulation in natural systems?

- A) The ability of natural systems to maintain balance and stability**
- B) The ability of natural systems to generate energy
- C) The ability of natural systems to reproduce
- D) The ability of natural systems to adapt to changing conditions

15. Which of the following is an example of self-regulation in organisms?

- A) Photosynthesis in plants
- B) Migration of birds
- C) Regulation of body temperature in humans**
- D) Formation of rainbows

16. What is a feedback loop?

- A) A mechanism for efficient resource utilization
 - B) A process of homeostasis in organisms
 - C) A self-regulatory process in ecosystems
 - D) A mechanism for adjusting and maintaining equilibrium in response to changes**
17. Which feedback loop helps maintain a balance between predator and prey populations?

- A) Climate feedback
- B) Positive feedback
- C) Negative feedback
- D) Predator-prey feedback**

18. What is an example of an engineering system that promotes sustainable practices?

- A) Building a coal-fired power plant
- B) Developing a waste-to-energy system**
- C) Designing a gas-guzzling car
- D) Constructing a landfill for waste disposal

19. Which engineering system focuses on optimizing water usage and minimizing waste?

- A) Renewable energy systems
- B) Green building design
- C) Waste management systems
- D) Water management systems**

20. What is the purpose of designing energy-efficient building envelopes?

- A) To maximize energy consumption
- B) To reduce the use of renewable energy sources
- C) To minimize energy consumption for heating, cooling, and lighting**
- D) To increase reliance on fossil fuels

21. What is the objective of waste-to-energy systems?

- A) To increase waste generation
- B) To promote landfill waste
- C) To convert waste materials into energy**
- D) To minimize recycling efforts

22. What is the purpose of designing intelligent transportation systems?

- A) To increase traffic congestion
- B) To promote reliance on fossil fuel-powered vehicles
- C) To optimize traffic flow and reduce congestion**
- D) To discourage the use of public transportation

23. What is the significance of resilience and adaptability in self-regulatory systems?

- A) They help in reducing resource utilization
- B) They enable systems to respond to disturbances and recover from disruptions**

- C) They promote waste generation and inefficiency
- D) They focus on maximizing profit without considering the environment

24. Which order of nature encompasses the study of living organisms and the complex interactions within and between species?

- A) Physical Order
- B) Biological Order**
- C) Social Order
- D) Mental Order

25) Which order of nature focuses on the study of human cognition, consciousness, and the workings of the mind?

- A) Physical Order
- B) Biological Order
- C) Social Order
- D) Mental Order**

26) What does the concept of the Four Orders of Nature emphasize regarding the interconnectedness of the orders?

- A) They are isolated entities
- B) They are mutually influential**
- C) They are unrelated to each other
- D) They exist independently

27. How can engineering students contribute to urban development in a way that considers the well-being and balance of all orders?

- A) By designing cities that prioritize economic growth
- B) By incorporating green spaces and efficient public transportation systems**
- C) By focusing solely on environmental preservation
- D) By promoting social inequality in urban areas

28) What is an example of seeking interdisciplinary approaches in engineering projects?

- A) Designing medical devices without consulting medical professionals
- B) Developing solutions solely based on technical considerations
- C) Collaborating with experts from different fields to address healthcare challenges**
- D) Ignoring social and ethical implications in engineering designs

29) Which factor should engineering students consider when designing solutions that promote sustainable development?

- A) Only the needs of humans
- B) Only the needs of the natural world
- C) Both the needs of humans and the natural world**
- D) Neither the needs of humans nor the natural world

30) What does the concept of mutual fulfillment among the four orders highlight in relation to engineers?

- A) Their lack of responsibility in considering ethical implications
- B) Their role in prioritizing economic development over well-being
- C) Their ethical responsibility to consider the well-being of all orders**
- D) Their isolation from the interconnectedness of the orders

31. What does "Realizing Existence as Co-existence" emphasize in engineering practices?

- A) Ignoring the interconnectedness of life
- B) Prioritizing economic gains over environmental concerns
- C) Considering the well-being of all life forms and promoting sustainability**
- D) Promoting competition and individualism

32) Which approach is essential for engineers to enhance co-existence and ecological balance in their designs?

- A) Analyzing individual elements in isolation
- B) Prioritizing economic considerations in the design process
- C) Applying systems thinking to consider interconnectedness and interdependencies**
- D) Focusing solely on short-term benefits

33) How can engineering students contribute to raising awareness about coexistence and sustainability?

- A) By promoting competition among communities and stakeholders
- B) By ignoring the environmental impact of their projects
- C) By engaging in knowledge-sharing and awareness campaigns**
- D) By prioritizing individual interests over collective well-being

34) What does "Realizing Existence as Co-existence" require from engineering students concerning their designs?

- A) Minimizing harm to the environment and prioritizing economic gains
- B) Prioritizing the well-being of all life forms and fostering collaboration**
- C) Neglecting ethical considerations for the sake of technical excellence
- D) Working independently without involving other professionals or communities.

35. Which of the following examples aligns with the concept of "Realizing Existence as Co-existence"?

- A) Constructing a large-scale industrial complex without considering its environmental impact
- B) Designing a self-sufficient eco-village that harmoniously coexists with the natural environment**
- C) Focusing on individual gains in engineering projects without collaboration
- D) Ignoring ethical considerations in the design process

36. What is the essence of adopting a systems thinking approach in engineering?

- A) Considering individual components in isolation
- B) Focusing on optimizing specific elements
- C) Understanding the interrelationships and interdependencies within a system**
- D) Addressing isolated problems efficiently

37. Which of the following examples demonstrates a negative consequence of an engineering project?

- A) Designing a sustainable water purification system for a rural community
- B) Developing a manufacturing process that generates hazardous waste**
- C) Implementing a renewable energy microgrid in an urban area
- D) Collaborating with medical professionals to create innovative healthcare solutions

38) What does the holistic perception of harmony emphasize in relation to existence?

- A) Isolation and separation of elements
- B) Disruptions and imbalances within systems
- C) Interconnectedness and interdependencies of all aspects of life**
- D) Optimization of individual components

39) What is the goal of designing systems and solutions that maintain equilibrium and avoid disruptions to the natural order?

- A) Maximizing economic gains
- B) Minimizing social disparities
- C) Ensuring environmental sustainability**
- D) Fostering technological advancement

MODULE-5: Implications of the holistic Understanding-a look at professional ethics.

1. What is the role of human values in engineering?

- a) Human Values guide professional conduct and decision making in engineering.**
- b) Human values are irrelevant in the field of engineering
- c) Human values are only important in personal life, not in professional life.
- d) Human values are subjective and vary from person to person.

Ans: a) **Human Values guide professional conduct and decision making in engineering.**

2. How do Human values contribute to social responsibility in engineering ?

- a) Human values promote ethical decision-making in engineering**
- b) Human values have no impact on social responsibility in engineering
- c) Human values are limited to personal beliefs and do not influence professional conduct.
- d) Human values encourage engineers to prioritize their own interests over societal well being.

Ans. a) Fearlessness

3. What role do human values play in fostering collaboration in engineering teams?

- a) Human values encourage respectful and inclusive interactions.**

b) Human values hinder effective communication and teamwork.

c) Human values are irrelevant in team dynamics.

d) Human values encourage engineers to work independently without considering others' perspectives.

Ans. **a) Human values encourage respectful and inclusive interactions.**

4. How do human values contribute to maintaining professional integrity in engineering?

- a) Human values have no influence on professional integrity

b)Human values guide engineers to act ethically and uphold professional standards.

C)Human Values are subjective and vary from engineer to engineer.

d)Professional integrity in engineering is solely determined by technical skills, not human values.

Ans. **b)Human values guide engineers to act ethically and uphold professional standards.**

5. What is the significance of human values in ethical leadership in engineering?

a)Human values guide ethical decision-making and inspire positive change.

b)Human values have no relation to ethical leadership in engineering.

C) Ethical leadership in engineering is solely based on technical expertise.

d)Ethical leadership in engineering is not influenced by personal values.

Answer: **A) Human values guide ethical decision-making and inspire positive change.**

6.What is the basis of ethical human conduct?

a) Cultural norms and values

b)Universal ethical principles

C)Personal preferences

d)Legal regulations

Answer. b)Universal ethical principles

7. How does ethical human conduct guide professional behavior in engineering?

a)It encourages engineers to prioritize personal interests.

b)It provides clear guidelines for professional behavior.

C)It allows engineers to make decisions solely based on technical considerations.

d)It is irrelevant to engineering practice.

Answer: B) It provides clear guidelines for professional behavior

8.Why is compliance with ethical codes and standards important in engineering?

a)It restricts engineers' creativity and innovation.

b)It ensures consistency, accountability, and professionalism.

C)It undermines the engineering profession.

d)It allows engineers to act unethically without consequences.

Answer: B) It ensures consistency, accountability, and professionalism.

9.What is the benefit of demonstrating ethical conduct in engineering?

a)It compromises engineers' reputation.

b)It leads to conflicts with colleagues and clients.

C)It builds trust and credibility in the profession.

d)It has no impact on professional relationships.

Answer: C) It builds trust and credibility in the profession.

10.What does humanistic education aim to foster in individuals?

a)Technical skills and academic knowledge

b)Social responsibility and ethical behavior

c)Competitive mindset and achievement

d)Specialized expertise in a particular field

Answer: b) Social responsibility and ethical behavior

11.What does humanistic education emphasize in terms of learning?

a)Memorization and regurgitation of facts

b)Passive absorption of information

c)Critical thinking and problem-solving

d)Rote learning and repetition

Answer: C) Critical thinking and problem-solving

12.How does humanistic education contribute to personal growth and well-being?

a) By promoting competition and achievement

b) By focusing solely on academic success

C) By nurturing emotional intelligence and self-care

d) By emphasizing specialized technical skills

Answer: C) By nurturing emotional intelligence and self-care

13.What is the role of values in humanistic education?

- a) Values are irrelevant in education
- b) Values are limited to personal beliefs
- C) Values are the foundation of ethical behavior**
- d) Values hinder personal growth and development

Answer: C) Values are the foundation of ethical behavior

14. How does humanistic education view learning beyond formal education?

- a) Learning ends with formal education
- b) Learning is focused on technical skills only
- c) Learning is a lifelong journey of personal growth**
- d) Learning is limited to academic knowledge

Answer: C) Learning is a lifelong journey of personal growth

15. A country which has transitioned to the universal human order is likely to have

- a. More global trade**
- b. Mutually enriching institutions and organisations
- c. More say in the UNO
- d. None of the above

Ans: More global trade

16. A harmonious world is created by values at 4 levels. These are

- a. Home, Family, society, country
- b. Individual, family, society, universe**
- c. School, home, office, temple
- d. None of the above

Ans: B

17. An individual people aspiring for the universal human order will be

- a. More responsible socially and ecologically
- b. More rich
- c. More Powerful**
- d. More well travelled

Ans: C

18. Competence in professional ethics refers to

- a. Ability to utilize power effectively
- b. Ability to augment the universal human order**
- c. Ability to make profit**
- d. Both b and c

Ans: Both b and c

19. Harmony should be maintained in

- a. Between body and life
- b. Between self and body
- c. Between life and environment
- d. All the above**

Ans: d

20. Many human values seem good or right due to

- a. Positive feelings
- b. Internal happiness
- c. Natural acceptance
- d. All the above**

Ans: d

21. Sah- astitva means

- a. Co-existence**
- b. Co-operation
- c. Co-option
- d. Corporate identity

Ans: a

22. Self-exploration uses two mechanisms; natural acceptance and -----

- a. Experimental validation**
- b. Reason
- c. Logical thinking
- d. Theoretical concepts

Ans: a

23. The purpose of value education is to

- a. Foster universal core values
- b. Make the syllabus easy
- c. Develop values in individuals
- d. Both a and c**

Ans: d

25. Values important for relationships are many; they may include

- a. Aggression
- b. Competition
- c. Integrity and character**
- d. Arrogance

Ans: c

26.The main purpose of establishing Navodya School is

- a. Promoting universal literacy
- b. **Providing good education in rural areas**
- c. Reduce dropout rates among rural growth
- d. Increase number of schools in rural areas.

Ans: B

27.Which of the following “four Pillars of Education” mentioned in Delors Commission report reflect the Indian value of “Vasudhaiva Kutumbakam”?

- a. Learning to Know
- b. Learning to do
- c. Learning to be
- d. **Learning to live together**

Ans: d

28.Which of the following categories of colleges is primarily intended for creating work ready manpower on a large scale?

- a. Autonomous college
- b. **Community college**
- c. Agricultural college
- d. Technical college

Ans: b

29.What should be done to develop moral values in students?

- a. Encourage moral value related works
- b. **Behave yourself as a role model**
- c. Display stories based on moral values
- d. Organize lectures on moral values

Ans:b

30.“Value is that which satisfies human desires”. “this statement is given by

- a. Aristotle
- b. Hume
- c. **Urban**
- d. Hoffding

Ans: Urban

31.Which one of the following is NOT considered a part of technical education in India?

- a. Medical
- b. **Management**
- c. Pharmaceutical

d. Aeronautical

Ans: Management

32. Human values are essential for

- a. Living in harmony with self, each other and nature
- b. Making life easier and happy
- c. Living with family and friends
- d. Making money to fulfil desires.

Ans: a

33. Innateness of human order is

- a. Existence
- b. Existence and growth
- c. Will to live
- d. Will to live with continuous happiness

Ans: d

34. To live in co-existence with entire nature-family order to world family order

- a. Knowledge
- b. Resolution
- c. Undivided Human Society
- d. Universal Human Order

Ans: D

35. 'Utilitarianism' in the professional ethics is

- a. An acquired habit that helps to lead a rational life
- b. A skill to solve a current ethical problem by comparing it with similar problems from the past and their outcome
- c. A right of activists to decide their own duties
- d. A judgement of an action by the consequences of that action

Ans: d

36. Professionals who breach the 'duty of care' are liable for injuries their negligence causes. The liability is commonly referred to as

- a. Professional offense
- b. Professional negligence
- c. Professional misdeed
- d. Professional malpractice

Ans: d

37. In the professional ethics, the degree of safety proposed to be attained varies with

- a. Design, duration, product
- b. Cost of risk, design and utility
- c. Cost of risk, perception and utility

- d. Product, perception and cost to risk involved

Ans: b

38. Carol Gilligan is associated with

- a. The natural justice
- b. The responsibility
- c. The Principle of loyalty
- d. The ethics of care

Ans: d

39. Ethical values are associated with?

- a. Social system
- b. Rule Making
- c. Compassionate living
- d. Devotional living

Ans: A

40. Which Philosopher suggested Wisdom, Courage, Temperance and Justice as four 'cardinal virtues'?

- a. Aristototle
- b. Aquinas
- c. Socrates
- d. Plato

Ans: D
